

Import addresses

A file with your customers/consignees can easily be imported.

The file must be created as a text file (filename.txt) or csv-file.

As delimiters you can use the following symbols: Pipe " | ", semicolon " ; ", comma " , ".

Import file

Select **Import & corrections** in the menu **Addresses**.

Click Browse and go to the folder where the import file is stored.

In this window, select **Open** and **Upload file**.

After the import you will get an overview of the imported addresses and possibly rejected addresses.

The addresses are verified after import, incorrect addresses are not listed in the address book and they need first to be corrected or deleted.

Your customers addresses to correct

1 records have errors

Alias	Street	Nr	Box	Country	Zipcode	City	Action
40018159	AVENUE DE VENDOME	128		FR	04100	BLOIS	 

After importation, you can find your addresses in **Addresses – Address management**. Here you can also create addresses manually, change or delete.

Create import file

File format: **mandatory field (max. length)(red)**, optional field (max. length)(green).

DO NOT CREATE HEADINGS!

Put on each line an address.

Description of import file addresses

column A : sequential numbering (40)

column B : Name1(35)

column C : Name2(35)

column D : Name3(35) - not used, added to Name2

column E : Street(35)

column F : Alias(15)

column G : CountryCode(3) - ISO 3166 alpha 2-letter country code

column H : ZipCode(10)

column I : City(35)

column J : Contact(35)

column K : Phone(25)

column L : email(64)

column M : Comments(40) – default NONE

column N : Address type(1) –P: private; B: business (default value when empty)

Save your file as a **CSV-file** (change the type of file format in File – Save as). Your file looks like the example below.
